HARINI K

Dindigul, India | +91 9245715348 | harinikannan065@gmail.com| LinkedIn | LeetCode | Portfolio | Github

SUMMARY

Full-stack developer with a backend focus, pursuing MCA. Experienced in building secure Node.js Express REST APIs with JWT authentication and RBAC, backed by MySQL and MongoDB, plus React front ends. Built a fintech-style digital wallet backend and a full-stack fleet platform; 200+ LeetCode problems solved. Seeking a Full Stack Intern role to grow into production engineering.

EDUCATION

Master of Computer Applications – (Full-time) *Sep 2025 – May 2027 (Pursuing)*
PSNA College of Engineering and Technology, Dindigul – Affiliated to Anna University, Chennai. *CGPA: 9.06*

Bachelor of Computer Science – (Full-time) *July 2022 – May 2025*
M. V. Muthiah Government Arts College for Women, Dindigul – Affiliated to Mother Teresa University, Kodaikanal. *CGPA: 8.224*

Higher Secondary Certificate – (Full-time) *2022*
Annamaliar Mills Girls' Higher Secondary School, Dindigul. *Percentage: 82.84%*

Secondary School Certificate – (Full-time) *2020*
Annamaliar Mills Girls' Higher Secondary School, Dindigul. *Percentage: 80.6%*

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+) HTML5, CSS3
Frontend: React 18, Redux Toolkit, React Router v6, Bootstrap
Backend: Node.js, Express.js, RESTful API Design, JWT Authentication, BCrypt
Databases: MongoDB, Mongoose ODM, MySQL, Sequelize ORM
CS Fundamentals: Object-Oriented Programming, Data Structures & Algorithms, Computer Networks
Tools: Git, Postman, n8n

HACKATHON EXPERIENCE

TransitOps Github
Fleet Management Platform — React 18, Redux Toolkit, Express.js, Sequelize ORM, JWT, MySQL

- Engineered a full-stack fleet management platform using React 18, Redux Toolkit, Express.js, and MySQL, **replacing manual fleet tracking** with a centralized system for trip dispatching, maintenance scheduling, and fleet monitoring.
- Designed and secured **15+ REST APIs with JWT authentication** and role-based access control (RBAC), implementing server-side validation to prevent duplicate vehicle allocation and invalid driver assignments.
- Built an analytics dashboard **delivering real-time ROI and fuel-efficiency metrics** with one-click CSV export, replacing manual reporting and enabling faster, data-driven decision-making.

PROJECTS

PhonePe Clone Backend Github
Node.js, Express.js, MongoDB, Mongoose, JWT, BCrypt

- Built a PhonePe-style digital wallet backend supporting user authentication, wallet balance management, peer-to-peer money transfer, bill payment, and transaction history through **RESTful APIs**.
- Implemented secure **JWT-based authentication** combined with **BCrypt password hashing** and **MPIN verification** to protect sensitive wallet operations from unauthorized access.
- Designed MongoDB schemas for users and transactions, seeded representative test data, and documented all APIs using **Swagger UI** for ease of integration and testing.

PUBLICATIONS

- **AdaptiNet:** Quantum-Inspired Federated Framework for Volatile Social Media Management and Digital Media Analysis – Presented at **INCOCOM 2026,** NPR Group of Institutions, Proceedings ISBN: 978-81-996222-8-9
- **Runtime Security Policy Enforcement** for Preventing Unauthorized Tool use in Agentic AI – Presented at **ICIT4GS – 2026,** Fatima College, Madurai.

ACHIEVEMENTS

- **Prompt Engineering —** Secured 2nd Prize in Tamil Nadu Government's Ilakiya Thiruvizha Competition.
- **Best Paper Award —** Recognized for research on Runtime Security Mechanisms for Agentic AI Systems**.**
- **Finalist of Intra-College Hackathon (SIH)** – Engineered a comprehensive beehive monitoring system integrating IoT, AI, and blockchain technology; established transparent honey-batch traceability, which improved consumer trust.

CERTIFICATIONS

- Google Cloud Fundamentals: Core Infrastructure – Credential Id: DJQ95DBDEF9N
- Developing Cloud Apps with Node.js and React – Credential Id: 8UQ2EKPWE2DH
